

COMING SOON

EMERGENCY PREPAREDNESS AND RESPONSE IN CHILDCARE

The new training from DCDEE is out now. I have been trained to provide this training. As of July 1, 2015 this training is **mandatory for all Child Care Home Providers and Child Care Center Directors (or their designated staff member).**

All existing licensed providers will have two years to get the training. (by July 2017) I recommend center directors take the training with their designated person, as they will only have four months to get a new person trained if that person leaves their facility and they don't have anyone else trained.

Newly licensed facilities will have only one year to get the training. (from licensing date)

Trainings will be limited to 10 facilities (2 per facility) and consists of two separate two hour trainings with a one hour assignment to be done between trainings. Beaufort/Hyde participants will be accepted on a first come first serve basis. Out of county participants will be accepted if there are any openings.

Trainings are planned to begin in October 2015. Watch our website for our next quarter training schedule for dates and registration information.
